Data Science with a Major in Data for a Human World (BS)

Web Site: <https://www.odu.edu/datascience> (<https://www.odu.edu/datascience/>)

Dr. Frank Liu, School Director (fliu@odu.edu)

The increased amount of available data has escalated the demand for data science professionals. Data Science is a field of scientific methods, processes, and systems to extract knowledge or insights from a variety of data sources. The Major in Data for a Human World provides coursework allowing students to explore diverse pathways in Data Science, including intersections with the Humanities, Geography, Computer Science, Mathematics and the Visual Arts. The major creates an interdisciplinary understanding of Data Science by developing critical thinking and problem-solving skills from other perspectives and apply writing, communication, and creativity skills to applications in Data Science.

For more information about the program contact Dr. Teresa Kouri Kissel (tkouri@odu.edu), Associate Professor of Philosophy & Religious Studies.
